Subject Index

Adsorption 215, 325
Air–water interface 152
Al/C 416
AlAs 27
Alkali metals 134
Alkanes 261
Amplitude 520
Anharmonic displacement parameters 134
Annealing 185
Antiferromagnetic coupling 377
Automotive catalysts 420

B/Si(111) 218
Barium stearate 185
Biquadratic coupling 370

C_{60} adducts 152
CaF_2 epitaxy 192
Ceria 420
Chemically grafted brush 159, 331
Chiral melting 126
Confinement 289
Conformal roughness 53
Correlation function 1, 284
Cr 411
Crystal surfaces 238
Cyrstal truncation rods 96

δ-layers 96
Diffraction 450, 455
Diffuse scattering 1, 13, 44, 101, 230, 251, 284
Diffuse X-ray scattering 366
Disilicides 90
Dislocation 90
Dynamic scaling 60

Electrochemistry 245, 251
Electron density 469
Electron diffraction 469
Electrons 416
Energy-dispersive X-ray diffraction 420
Epitaxial structure 205
Epitaxy 145
Evanescent-wave emission 437
Exchange biasing 388

Faceting 105
Fe 411
Fe/Cr superlattices 370
Fe/Nb multilayers 377
Films 507

GaAs 27
GaAs(004) 437
Glancing-incidence X-ray diffraction 101
Global minimization 542
Gratings 53
Grazing incidence 226, 405
Grazing incidence synchrotron 205
Grazing incidence X-ray reflectivity 96
Growth 44, 60, 86
Growth morphology 205

Halides 238
High-T_c superconductors 235
Holmium 398
Homoepitaxy 65
Hydrogen in metals 210
Hydrogen in multilayers 377

InAs 437
In-plane magnetization profile 393
Incommensurate lattice modulation 192
Incommensurate overlayer 141
Interdiffusion 185
Interface roughness 10, 18, 235
Interfaces 218, 296, 306, 337, 487, 538
Interfaciai structures 524
Interlayer exchange coupling 357, 366
Inversion 514

Kinetic roughening 27, 60, 65

Langmuir–Blodgett films 185
Layered magnetic structures 357
Liquid crystals 289
Liquid interfaces 168
Liquid metals 257
Long-range order 101

MAD 218
Magnetic 342
Magnetic films 382, 408
Magnetic layers 494
Magnetic moments 382
Magnetic scattering 405
Magnetic thin films 366
Magneto-optical effects 408
Maximum entropy 469
Metal evaporated tapes 393
Metal–oxide interface 205
Metallic multilayers 10
Micelles 309
Microemulsions 296, 533
Mismatch 90
Molecular beam epitaxy 27
Molybdenum 86
Moments 538
Monolayers 152
Multilayers 13, 34, 408, 416, 507

Néel transition 370
Neutron reflection 301, 520, 533
Neutron reflectivity 159, 306, 331
Neutron reflectometer 507
Neutron reflectometry 168
Neutron scattering 382, 398
Neutron supermirror 500
Neutrons 267, 450, 455, 494, 524
Non-ionic 325
Numerical profiling 514

Off-specular 77
Oil–surfactant–water system 168
Order–disorder phase transformation 101
Organic multilayers 284
Organic–inorganic 145

Oscillations 201
Oxidic mutlilayers 18, 388

Phase 520
Phase behavior 238
Phase problem 445
Phase separation 301
Phase transformation 105, 126
Pitting 251
Platinum 77
Poiseuille shear 309
Polarized neutron 342
Polarized neutron reflectometry 366, 388, 393
Polymer blend 301
Polymer brushes 337
Polymer gel 159
Polymer network 331
Polymers 53, 174, 267, 320, 533

Quantum wells 487

Random copolymers 306
Rare gas 215
Reconstruction 126
Reflectivity 77, 141, 257, 267, 337, 411
Reflectometry 174, 416, 524
Roughness 1, 13, 27, 34
Roughness correlation function 18

Samarium 86
SANS 309
Scattering 34, 296
Scattering theory 18
SFA 289
Shear 325
Short-range order 101
Si(001) 430
Silicon 126
Silicon surface 105
Silver 65, 134
Smectic 174
Solid–liquid interfaces 245
Specular 267
Specular neutron reflectivity 320
Specular reflection 514
Specular reflectivity 201
Sputter-deposition 77
Standing wave 450, 455
Step interactions 105
Strain 90, 437
Strain relaxation 192
Submonolayers 70
Subsurface strain characterization 445
Superlattices 342, 411
Surface critical behavior 210
Surface diffusion 70
Surface forces apparatus 289
Surface morphology 70
Surface relaxation 134
Surface scattering 261
Surface structure 426, 430
Surface X-ray diffraction 86
Surface X-ray scattering 10, 210
Surfactants 325
Synchrotron radiation 445

Tethered chains 320
Thermal stability 218
Thermal vibrational amplitude 430
Thin films 44, 174, 230, 235, 342, 398, 450, 455
Thin magnetic films 357
Ti oxide 500
Ti–Be multilayer 500
Transesterification 301
Two-length scales 398

UO_2 405
Ultra-thin interface layers 226

Vibrations 426

Wetting 215

X-ray and neutron reflectivity 538
X-ray diffraction 141, 145, 201, 226, 469, 487
X-ray multiple diffraction 445
X-ray neutron reflectivity 152
X-ray reflectivity 215, 230, 251, 542
X-ray scattering 134, 245, 289
X-ray standing waves 96, 426, 430, 437
X-rays 34, 257, 261, 267, 405

Zeeman 494
Zirconia 420
